[Salvia](#) Divinorum is actually an herb that has been used for various reasons and purposes in specific parts of the world, provided mental relaxation at the top of the list. Its leaves have been dried to make use and they not only have got the medicinal value but also are consumed for smoking purposes. Its leaves can also be chewed to get the maximum out of it along with much other significance. Salvia Divinorum is commonly called as Salvia and it contains many psycho active chemicals and an extremely potent substance called salvinorin A in it making it declared illegal in some parts of the world. As unlike most other visionary compounds, it is not an alkaloid.

[Salvia divinorum](#) has been used for centuries by people of all ages in the Mazatecs of Central Mexico as a powerful visionary herb since it has been traditionally prepared and prepared under the strict supervision of experienced Shaman. It has been used most probably for medicinal purpose, healing, divination and to test and notify ones consciousness. Salvia divinorum is basically a species of sage, having the genus salvia. Currently Salvia divinorum is known to produce visions although there are many others like around 1000 species of Salvia have been found.

Salvia requires a very appropriate weather and climate to make it grow. It can be grown even in pots but ultimately it has to be used in the form of crushed dried leaves after it is undergone by a special treatment. It rarely produce seeds and basically is a hybrid and has become self sterile even in the hybridization process. Along with specific weather, there are certain Light & temperature requirements to make it grow fully and to prevent them to get wither. The best [buy salvia](#) plants require a lot of space to grow and spread their roots so they should be shifted to larger pots every few months in case they are growing quickly.
